ABSTRACT. The abstract should briefly state the purpose of the manuscript, the problem to be addressed, the objectives to be achieved, the approach taken, and the nature of results or conclusions that can be expected. It should stand independently and tell enough about the manuscript to permit the reader to decide whether the subject is of specific interest. The abstract shall be typed single space, justified, centered, and with a column width of 4.5 inches. The abstract is preceded by a heading of bold "ABSTRACT" and its length may not extend beyond the first page.

Keywords: icoci, template, conference proceeding, example of format

INTRODUCTION

The International Conference on Computing and Informatics (ICOCI) publishes bound sets of printed conference proceedings for personal, institutional, and library usage. The availability of hardcopy enhances the longevity of your work and elevates the importance of your conference contribution to professionals through archival publication.To preserve the consistency and quality of the proceedings, all authors adhere to thelatest version of ICOCI conference proceedings format.

This document is intended to serve as a visual and instructional guide, and as a Microsoft Word document template, for the ICOCI conference proceedings format. Most importantly, it includes predefined *styles* to provide the basic formatting required by the publisher's formatting instructions. Such styles include the *Normal* style for body text, the *Abstract* style for abstract text, the *Endnote Text* style for bibliographical references, the *Author* style, *Title* style, *Paper Number* style, and so on. There are also styles for centered equations, figure and table captions, section and sub-section headings, footnote text, *etc*. To use this electronic document as a template, simply copy and change its contents with your own information while maintaining the required predefined style, rather than starting anew. Since this document is not a tutorial on how to use Microsoft Word, please refer to Microsoft Word Help for more information on formatting using predefined styles.

Your manuscript should include a paper number, a title, an author listing, an abstract, an introductory section, one or more sections containing the main body of the manuscript, a concluding summary section, and a reference section. You may also include a section on notation, an acknowledgements section, and appendices, as illustrated in this sequel, However, the total page number should not exceed 6 physical pages. You should *not* include a leading cover sheet.Author affiliation shall appear on the first page, added as a footnote to the last name

of each the author. If a distributional release statementor copyright notice isrequired by your sponsor, this is added as a footnote to the title of the manuscript, appearing on the first page only.Page numbers should be centered halfway between the lower marginand the bottom edge of the page (*i.e*., approximately 0.5 inches from the bottom). Copy should be single space with double space between paragraphs, with the first line of each paragraph indented 0.2 inches.

The recommended sans-serif font for titleand author listing is *Arial*.The title font should be: 14-point sans-serif, centered, and bold. The author-listing font should be 12-point sans-serif, centered, and bold. The recommended serif font for body text, headings, *etc*., is *Times New Roman* at 11 point. The captions for figures and tables are bold 10-point *Times New Roman*.The endnote reference text and footnote text is 9-point serif font. The right-hand margin of body text should be justified; if not, it should be fairly even nevertheless.All text and text background shall remain uncolored (black on white).These conventions should be automatically implemented by Microsoft Word when the predefined styles of this template are used.

THIS IS A SAMPLE OF A GENERAL SECTION HEADING

Numbering of section headings and paragraphs should be avoided. Major section headings are majuscule, bold, flush (aligned) left, and use the same style san-serif font as the body text. Widow and orphan lines should also be avoided; more than one line of a paragraph should appear at the end or beginning of a page, not one line by itself. A heading should not appear at the bottom of a page without at least two lines of text. Equations, figures, and tables must be sequentially numbered with no repeated numbers or gaps.Excessive white space—such as large gaps before, between, and after text and figures—should beeliminated.

This Is a Sample of a Secondary (Sub-Section) Heading

Secondary, or sub-section, headings are title case (miniscule lettering with the first letter of major words majuscule), flush left, and bold. Secondary headings use the same serif font style as the body text and, like section headings, should not be numbered. Tertiary headings should be avoided, but if necessary, they are run-in, italic, and end in a period, as illustrated with the next six (6) paragraphs.

$$a = b^2 \tag{1}$$

Equations. Equations are centered with the equation number flush to the right. In the text, these equations should be referenced by name as Eq. (1) not eq.1, (1), or *Equation 1*.To improve readability, scalar variable names such as a and $b^2$are usually italicized when appearing in text and equations.[1]

Abbreviations. When units of measure are abbreviated, lower case without periods is preferred in most instances; *e.g*. km, kg, sec, m/s, *etc*., but in. for inch.

Figures. Illustrations are referenced by name and without formatting embellishments, such as Figure 1, Figure 2, *etc*., or, Figures 3 and 4 (*e.g*., not figure (1), Fig. 1, Figure 1, *Figure 1*, *etc*.). Each illustration should have a caption unless it is a mere sketch. Single-phrase captions are usually in title case; they are bold 10-point serif font and centered below the figure as shown in Figure 1. An explanatory caption of several sentences is permissible. Ideally, every illustration should be legibly sized – usually about one-half or one-quarter page – and appear

---

[1]Although footer may be used, it is NOT encouraged. Use it sparingly or when there is no other way to clarify the meaning of the texts.

in the text just before it is called out or mentioned. Alternatively, it is also permissible to place all figures together at the end of the text as a separate appendix; however, these two conventions should not be mixed. All figures and callouts should remain clearly legible after reduction. All illustrations appear as black and white in the final printing, although colors are retained in the electronic (CD-ROM) version.
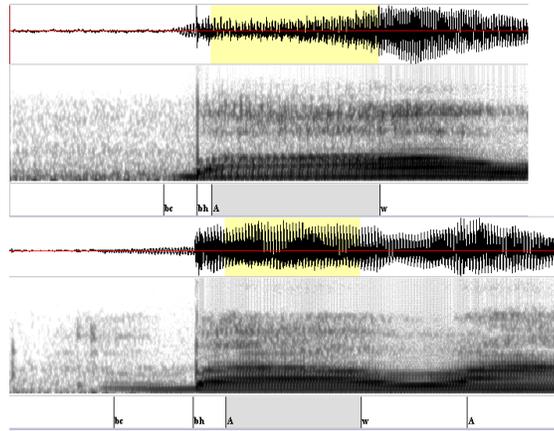

Figure 1. A Caption Goes Here.

Graphic Formats. The highest quality formats are Encapsulated PostScript (EPS) and PDFvector-graphic formats. These formats are recommended for all illustrations, unless they create document files that are excessively large.Specifically, you should change the graphic format or compress the image resolution whenever an illustrated page takes more than two seconds to render onscreen, or, whenever the total manuscript file size starts to approach 5 Mb.Photographs, illustrations that use heavy toner or ink (such as bar graphs), and figures without text callouts, may be suitably displayedwithpicture formats such asBMP, GIF, JPEG, PNG, TIFF,*etc*. Line drawings, plots, and callouts on illustrations, should not use picture formats that do not provide sharpreproduction. Note that the Windows Metafile Format (WMF) should be avoided.

References and Citations. The parenthetical citation of bibliographical references is indicated in the text preferably at the end of a sentence(Hipp, 2000).Citations should precisely follow APA method for both, parenthetical citation and reference entries. The reference section of this article provide samples of the 6th edition APA reference format. The reference list must be sorted alphabetically. The citation of private communication is especially discouraged, but if required it should be cited as a footnote and include the date, professional affiliation, and location of the person cited

***Tables*. Tables are referred to by name in the text as**

Table 1, or, Tables 2 and 3 (*e.g*., not table 1, Tbl. 1, or *Table 1*). The title is centered above the table, as shown in

Table 1. The font size inside tables should be no larger than the body text, but may be adjusted down to 9-point if necessary (10-point serif font is considered nominal). Note that table units are in parentheses. Only the minimum number of table lines needed for clarity is desired. Ideally, every table should appear within the text just after it is called out.

Table 1. A Caption Goes Here.

Animal	Description	Price ($)
Gnat	per gram	13.65
Gnu	stuffed	92.50
Emu	stuffed	33.33
Armadillo	frozen	8.99

Equations, figures, and tables must be sequentially numbered with no repeated numbers or gaps. Each figure and table shall be called out in the text; gratuitous figures and tables that are not called out should be eliminated. Intermediate equations may be numbered without being called out.

MANUSCRIPT SUBMISSIONS[1]

The Portable Document Format (PDF) is the preferred format for electronic submissions. However, the final manuscript (called camera ready) must be submitted in MS Word document (.docx or .doc). The page size should be 8.27 inches by 11.69 inches exactly (A4). If you submit a PDF file, you should use "press-quality" or "high-quality" software settings to create your PDF file; these settings tend to keep the PDF file true to the original manuscript layout, and automatically embed the correct fonts, *etc*. Otherwise, settings such as "Embed All Fonts", *etc*., should be selected as available. The use of internal hyperlinks within the electronic file is not encouragedbecausehyperlinks may not be supported in the final version of the electronic proceedings.

Journal Submissions

If you wish to submit this manuscript to the *Journal of Information Communication technology* (JICT—at http://www.jict.uum.edu.my), it must be reformatted into a double-spaced format. This can be done easily with this template. Open the *Normal* style for editing and choose double spacing instead of single spacing; the document will reformat itself correctly.

CONCLUSION

Your final manuscript should be camera-ready as submitted—free from technical, typographical, and formatting errors. Manuscripts not suitable for publication are omitted from the final proceedings.

ACKNOWLEDGMENTS

Any acknowledgments by the author may appear here.The acknowledgments section is optional.

NOTATION

      a   a real number

---

[1]By contributing your manuscript for proceedings publication, younecessarily extend any copyrights to the ICOCI 2011 and its designated publisher, to allow the ICOCI 2010to publish your manuscript content in all the forms that it wishes.

      b   the square root of *a*

If extensive use of mathematical symbols requiresa table of notation, that table may appear here. Where the first mathematical symbol is introduced, a footnote should direct the attention of the reader to this table. Thenotation table should be simple and reasonably consistent with the standardsofAPA format. The notation table does not need its own caption like an ordinary table, since the section heading serves this purpose.The notation section is optional.

Miscellaneous Physical Dimensions

The page size shall be the A4 standard of 8.27 inches by 11.69 inches (210 mm x 297 mm). Margins are as follows: Top—0.75 inch (19 mm); Bottom—1.5 inches (38.1 mm); Left—1.25 inches (31.75 mm); Right—1.25 inch (31.75 mm). The title of the manuscript starts one inch (25.4 mm) below the top margin. Column width is 6 inches (152.4mm) and column length is 8.75 inches (222.25 mm). The abstract is 4.5 inches (114 mm) in width, centered, justified, 10 point normal (serif) font.

APPENDIXES ARE NOT ENCOURAGED

Appendixes are not encouraged. Page limit for the conference article is 6 pages maximum. Any extra page is charged at USD20 per page. Therefore, the paper should be as precise and as compact as possible. If an appendix is deemed necessary, then the title of each appendix section is preceded by "APPENDIX A: ", followed by "APPENDIX B: ", *etc*., when multiple appendixes are necessary. Appendices normally go after references. The contents of each appendix must be called out at least once in the body of the manuscript.
